DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species #1:

Figures 1-8 relating to specific image having superimposed noise.

Species #2:

Figures 9-10 relating to specific image outputted with low frequency.

Species #3:

Figures 12-13 relating to specific image having image data synthesized with sub-image data.

Species #4:

Figure 15 relating to specific image outputted with the lowest resolution.

Species #5:

Figure 16 relating to specific image with the lowest resolution is enlarged to an image size as that of the highest resolution.

Species #6:

Figures 17-19 relating to specific image with noise removed from the image.

Species #7:

Figures 21-30 relating to specific image getting halftone processing using dithering.

Species #8:

Figures 31-35 relating to specific image having image data converted to monochrome image.

Species #9:

Figures 39-43 relating to specific image with image data replaced.

Species#10:

Figure 44 relating to specific image with image data inverted.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Art Unit: 2622

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
